

We are witnessing the Taliban victory in Afghanistan; should I say it is antichrist related you would treat me as some kind of nutter. After several weeks of prayerful reflection I think I see it. It was not a war but a handover. Why did Biden withdraw and take the keys to those hum vees with him? This is what perplexes me; not the hand over itself!

Research on You Tube "The Long March Of Mao Tse Tung". Why should this itinerant farmer go on a march around China taking over the place and leaving Chiang Kai-Shek abandoned. The prince disposed that China was to become his means of controlling the world. For the moment we see China's economic claws tightening around the world. The Taliban take over and China moves in. Keep your eyes on Pakistan; they call Imran Khan "Taliban khan" but he is not enough left. A leftist government will take over there soon and we will have Chinese influence stretching all the way to Iran.

Essentially what is China? Or in other words what is communism? Why has the Church condemned communism, particularly under Pius XII? The essence of communism is satanic worship! Be it in the form of a particular political party or secret society such as the rosicrucians!

Watch for the spread of these forms of communism; and this is what we are witnessing in Afghanistan. We are going to witness the disappearance of national governments which will be replaced by the umbrella organisation of the United Nations. Who eventually will show their true hand as fore runners of the antichrist.

Are we heading into the age of the great king and pope or into the The Tribulation? I do not know but the fall of Afghanistan makes me lean to the latter.
